

better - when applying the rule:

- Easy overriding of methods.
  - Mocks can use direct methods of related mock/original objects.
- Adaptable implementations/modes are easier.

\*1 LoD: Special case of cohesion  
"principle of least knowledge" [Wiki] } instead:  
direct friends  
⇕  
- Unit should be limited to direct friends  
and neighbours

⇒ Unit only talks to these friends  
What is a "friend":

- own class
- parameters
- created objects
- associated classes

LoD:

- maintainability
- adaptable

⇒ less dependent, more focused
