Rule 9

Tell, don't ask (No Getter /Setter / Properties)

Also famous under the name „Tell, don't ask"

Claim: Encapsulation does not mean to add getter/
setter / properties afterwards.
→ Object would „expose it's implementation
details directly" [OC]
→ Place behaviour into the object instead.
of exposing it's data and letting
others manipulate it.
→ less deuplication
→ Better localization of behaviour

Martin Fowler Ptg

→ Bundle the data with the behaviour

ask

logic   data

· exposes implementation
  details
· behaviour is outside
· behaviour is
  „littered around"

„tell"

logic
data

· operations to execute
· more like
  „message sending"
